English C1

Russian A2

I consent to the processing of my personal data for the purpose of recruiting for the position I am applying for

FILIP STAWICKI

As of 2019, I am working as a IT System Administrator, but my career goal is to work as a Front-end Developer. On a daily basis I program using React, on which I am constantly improving. I graduated with a masters degree in computer science from Warsaw University of Life Sciences. During my studies I numerous times coded apps in groups using code review and tools such as trello and GIT, so I am no stranger to group work. I also have experience in unit and integration tests. I am fluent in English, patient and responsible.

Projects

Application to find services in the area (Teamwork)

HTML, CSS(Material UI), REACT, TYPESCRIPT, MONGO DB

An application showing services located in the user's neighborhood on a map. My tasks included preparing the interface of several sub-pages and widgets for the map based on the graphic designer's designs, as well as displaying data retrieved from the database. During the project we used github and trello, also code review was conducted regularly.

My Portfolio

www.filipstawicki.com

HTML, CSS (Styled Components), JAVASCRIPT, REACT

Portfolio showing my projects, experience and skills.

Mexican Delivery

<https://mexicandelivery.netlify.app/>

HTML, CSS (SCSS), TYPESCRIPT, REACT (Router)

An application for ordering food. Data is retrieved from an external API. The customer can browse the menu, display details about each dish (with React Router) and also add items to the cart (with Context API).

On The Rocks

<https://on-the-rocks.netlify.app/>

HTML, CSS (CSS Modules), JAVASCRIPT, REACT

A drink search application. The data is retrieved from an external API. The user can search for drinks by name through the search engine, display a random drink or display additional information such as ingredients, preparation instructions and more.
