

# FILIP STAWICKI

As of 2019, I am working as a IT specialist, but my career goal is to work as a Front-end Developer. On a daily basis I program using React, on which I am constantly improving. I graduated with a masters degree in computer science from Warsaw University of Life Sciences. During my studies I numerous times coded apps in groups using code review and tools such as trello and GIT, so I am no stranger to group work. I also have experience in unit and integration tests. I am fluent in English, patient and responsible.

## Projects

### Application to find services in the area (Teamwork)

**HTML, CSS(Material UI), REACT, TYPESCRIPT, MONGO DB**

An application showing services located in the user's neighborhood on a map. My tasks included preparing the interface of several sub-pages and widgets for the map based on the graphic designer's designs, as well as displaying data retrieved from the database. During the project we used github and trello, also code review was conducted regularly.

### My Portfolio

**[www.filipstawicki.com](http://www.filipstawicki.com)**

**HTML, CSS (Styled Components), JAVASCRIPT, REACT**

Portfolio showing my projects, experience and skills.

### Mexican Delivery

**<https://mexicandelivery.netlify.app/>**

**HTML, CSS (SCSS), TYPESCRIPT, REACT (Router)**

An application for ordering food. Data is retrieved from an external API. The customer can browse the menu, display details about each dish (with React Router) and also add items to the cart (with Context API).

### On The Rocks

**<https://on-the-rocks.netlify.app/>**

**HTML, CSS (CSS Modules), JAVASCRIPT, REACT**

A drink search application. The data is retrieved from an external API. The user can search for drinks by name through the search engine, display a random drink or display additional information such as ingredients, preparation instructions and more.
